SUMMARY

MSc Cyber Security student with hands-on experience in security monitoring, vulnerability assessment, and compliance. Familiar with Windows and Linux environments through academic and project work, with exposure to scripting (Python, Bash) and system troubleshooting. Skilled in using diagnostic tools (Wireshark, Nmap, OpenVAS) to identify and resolve technical issues.

EDUCATION

MSc Cyber Security

University of Surrey • (September 2025 - Present)

BSc (Hons) Computer Systems (Cyber Security)

Nottingham Trent University • 2.1 (2023)

EXPERIENCE

Application & Cloud Security – AWS & Azure Projects

- Monitored AWS activity using CloudTrail & CloudWatch, detecting IAM and API anomalies.
- Investigated failed login attempts and real-time threats in Azure via Microsoft Sentinel.
- Built visual dashboards using KQL to prioritise security incidents (Event ID 4625).

Vulnerability Assessment & Penetration Testing

- Identified 29+ vulnerabilities using OpenVAS and Nmap (e.g., exposed PostgreSQL).
- Simulated exploits and implemented remediation strategies such as hardened firewall rules.
- Demonstrated strong threat triaging and incident escalation abilities.

Secure Systems Design & Compliance (ISO 27001)

- Designed an ISMS framework to address a real-world breach.
- Mapped risks and controls to ISO 27001 and GDPR requirements.
- Produced clear technical and procedural documentation for compliance and incident response.

Email Spam Threat Detection Using ML

- Used python to build a spam classifier using TensorFlow/Keras, achieving 97% accuracy on sample email datasets.
 - Applied NLP techniques for text cleaning, tokenization, and classification.
 - Evaluated model performance using AUC and confusion matrix metrics.
 - Gained experience in machine learning pipelines and email threat detection.
-

SKILLS

Operating Systems: Windows, Linux (Kali, Ubuntu)

Networking & Systems: TCP/IP, Active Directory, VMware, Wireshark

Scripting & Tools: Python, Bash(basic)

Security Tools: Nmap, OpenVAS, Metasploit

Soft Skills: Problem-solving, Collaboration, Adaptability, Clear Communication

ADDITIONAL

- Working towards certification in CompTIA Security+
- Active participant in CTF challenges (TryHackMe)
